

news

In an evangelical Alliance Prayermeeting at the employment agency in Plauen a candle could not be lit, because in the fire safety regulations open flames were prohibited and no electric candle stood ready. So it had to be done without this worship symbol.

Muscle and joint pain may be a result of poor posture. What about the ergonomics of your workplace. As self-help, we offer a quick check of your own PC workstation with the brochure: "Healthy working on the PC", see Appendix.

Health Tip: If you work in a sitting position, we recommend to stand up regularly to relieve the spine, e.g. when talking on the telephone.

put into practice

Christmas season is candle season. The fir trees with electric candles are now probably standard, but many Christmas wreaths pose a substantial residual risk of fire. There are elegant and cheap offerings for electrical candles that create a pleasant atmosphere with no fire risk for hospitals, retirement homes, churches and private homes. These are usually equipped with a flickering light and also available with rechargeable batteries, remote control or blow on and out function.

Concerning hygiene in kitchens, we have developed some useful information. First of all an info, "hygiene for kitchen staff" and posters about disqualification for work in a kitchen and hygiene of the employees who are to be adapted to the individual use. It will be followed by an info "Food Hygiene", which deals with the storage of food and by an info "Hygiene of working equipment", which then deals with issues of kitchen design and with the cleaning and disinfection of surfaces and machines.

training

On the subject: "Thief of our freedom" 25 pastors and leaders of BEFG and BFP came on the 06. Juli to Zwickau. Dipl.-Psych. Wolf-Dieter Hartmann gave valuable input about being questioned as a leader and to handle with transference of expectations. Together with his wife Rose, he answered questions of the participants. They have the vision of the restoration of "The church as a place of healing". Continuation will follow.

We recommend all pastors and leaders to have a look at the publication of the occupational health and safety insurance in the Internet at the end of October and to register for the free seminars soon.

*There are no hopeless situations.
There are only people who have become hopeless about it.*
(Clare Boothe Luce)
