### **Hygiene-/Pandemic-Plan**

Concerning the discussion on the possibilities of a Pandemic, for instance by means of the new influenza A/H1N1, our employment-physician Dr. Peter Fabritius has given the following instructions. On top of it we have given out a **model-plan** for the use in free-Churches and their institutions. This plan is originally arranged for the use in kinder garden-setting, but is also applicable in our Churches. It contains general hygiene-standards for the cleaning of hands, winding up of babies etc. Also, a **pandemic-plan**, constructed as a resource in case of emergency, is been added to this letter.

#### **Handout by our employment-physician Dr. Peter Fabritius:**

The flu-virus "Schweinegrippe" ("swine-influenza") is not as serious in Germany as the yearly asian-flu. **Necessary special ways of acting: at the moment none.**

In case of a pandemic situation, that means progressing new dangerous viruses, public gatherings and visits of the work-places during such times are to be reduced, according to the pandemic-plan of the "Bundesministerium des Inneren" (inner Department of the German council). **No declarations for such cases are given.**

The most helpful information's are being given by the Robert-Koch-Institute [www.rki.de](http://www.rki.de).

#### **Attention:**

In kinder gardens and public assemblies the general standards need to be obtained: **Hygiene-plan, cleaning-plan**, documenting and checking on the suitability of cleaning-facilities are generally prescribed.

**Inoculations for flu-virus protection** are highly advised for all **stuff-members of kinder gardens, Pastors and Leaders of groups** (even without the noise of the media).

-----  
Sincerely

Your occupational health and safety manager Dipl.-Ing. (BA) Stefan Breite

PS: Flyers with the advises of the RKI can be downloaded from the following website in 11 languages (e.g. english, french, portuguese, russian, spanish, arabic, etc...):
